

KITCHEN EMISSION CONTROL FOR RENTAL

SMOG HOG® Kitchen Emission Control Systems

Our kitchen emission control system is specially designed for kitchen use, dedicated in solving smoke and grease problems. The kitchen emission control is designed to eliminate smoke caused by cooking emissions. We work closely with a well-known commercial kitchen specialist, Smog-Hog that uses electrostatic precipitator technology (ESP) to remove grease and odors from cooking activities. This in turn creates clean air in your kitchen environment. It does not only improve the lifespan of your kitchen equipment, but also improves air quality for your kitchen staffs. For more information, please feel free to browse through our product information on kitchen emission control.

Benefits of a SMOG HOG® Air Cleaning System
